

Dear Hiring Team,

I am writing to apply for the Data Science & Machine Learning Internship at Bharat Academix. I am currently pursuing my B.Tech in Computer Science at SR University and have a strong interest in Artificial Intelligence, Machine Learning, and Full Stack Development. Through academics, hackathons, and personal projects, I have developed practical experience in building real-world AI and ML applications.

I have previously worked on multiple AI/ML projects including handwritten digit classification, cyberattack detection using machine learning, real-time traffic intelligence systems using YOLOv8 and OpenCV, and face recognition-based security systems. These projects helped me gain hands-on experience with Python, TensorFlow, Scikit-learn, Pandas, NumPy, OpenCV, and deep learning concepts.

Apart from AI/ML, I also have experience in backend and frontend development using React.js, Node.js, Express.js, and FastAPI. I enjoy solving real-world problems and continuously learning new technologies. I actively participate in hackathons and collaborative projects, which has improved my teamwork and problem-solving abilities.

I am eager to contribute my skills, learn from industry professionals, and gain practical exposure through this internship opportunity. I would be grateful for the opportunity to be a part of your team.

Thank you for your time and consideration.

Sincerely,

Ganji Anirudh
